

NANOENERGY 2026

LONDON (UK) FROM 4-8 OCTOBER 2026

SHORT BIO

Professor Jawwad Darr is a materials chemist and Head of the Clean Materials Technology Group at University College London (UCL). His research focuses on developing advanced functional materials for energy applications, such as batteries, and has led to over 200 publications, three patents, and the graduation of numerous PhD students. He co-founded the UPSIGN charity, a global network fostering science and innovation between the UK and Pakistan, and his work aims to address challenges in areas like clean energy for remote communities.
